

For the space formerly known as the laptop Lounge I proposal several changes. First, make the space more visible, implement signage to show visitors at the library where the space is. Within the space itself I propose that there be a place for students to write on a larger scale (a white board, chalk board wall etc.) the walls themselves could be a brighter color to make the space friendlier. Artwork or posters in the space would also be a pleasant addition, maybe this is a space where some of the posters about library resources go. Additionally, this could be a space for where some of the arts and craft supplies are or other activities that are in the upper floor of the library.

Sample of a color wall (made of mica colors) the other walls painted a white or grey.
